### Power and Ground Connections

- Transformer having 20 mA output to ground.
- Power supply 24 VDC to 56 VDC.

### Warning Connections

- Transformer having 20 mA output to ground.
- Power supply 24 VDC to 56 VDC.

---

**NOTE:**

- The term "ground" is used in the circuit diagram and specification table. It is essential to check the specific ground connections and power supply requirements for the correct operation of the equipment.

---

**INSTALLATION D华润E**: The installation diagram includes connection points and grounding considerations. It is crucial to follow the provided wiring diagrams and ground connections to ensure safe and effective operation.

---

**WARNING:**

- The equipment is designed to operate in specific environments and conditions. Improper installation or usage can lead to accidents and damage to the equipment.

---

**SPECIFICATIONS:**

- Voltage Supply: 120V
- Maximum Burden Resistance: 50 ohms
- Transformer: 20 mA output

---

**NOTE:**

- The equipment is intended for use in Class I, Division 2, Group C and D hazardous areas. Installation and operation must comply with applicable safety standards and regulations.

---

**CERTIFICATION:**

- The equipment has been certified and tested for compliance with relevant safety and performance standards.

---

**Wiring Diagrams:**

- Detailed wiring diagrams are provided for power, ground, and control connections.

---

**Connection Points:**

- Transformer output to ground, power supply connections, and control connections are clearly marked.

---

**Environment:**

- The equipment is designed for use in various environments, including hazardous areas.

---

**Manufacturer:**

- Guantanamo Environmental Ltd.

---

**Technical Support:**

- For technical support, contact Guantanamo Environmental Ltd. at the provided contact information.
